

Graduate Data Scientist

We are currently seeking talented individuals, at both an internship and graduate level, who wish to pursue a career in the dynamic world of data analytics and science.

The Role:

The successful candidates will have a passion for problem solving, and using their technical skills to make a real impact on business decisions.

Great data scientists comes from a wide range of backgrounds, but there are some basic things you will need:

- Some ability to code. *You don't need to be able to build a Google Go equivalent Ai, but having working knowledge of any programming / data visualisation language such as Python, C++, R, MatLab, SQL etc is the first step to getting hired.*
- You would have completed/be undertaking a relevant degree. *This may not be computer science though. We have seen great candidates with Engineering, Quant Finance, Mathematics and even History succeed in this field.*
- Ability to work well under pressure, and communicate well with a wide range of business units.

Who We Are

JamieAi believes that there is a smarter way for technically talented interns, graduates and second jobbers to discover fantastic career opportunities within Data Science, Technology and Quantitative Finance. Discover more at www.jamieai.com
