Spectralys Biotech is looking for a junior analytical scientist

Spectralys Biotech is a spin-off under creation from the Université libre de Bruxelles offering innovative analytical solutions for the pharma industry. It is based on our unique expertise at leveraging infrared spectroscopy (FTIR) to obtain information on 4 critical parameters concerning protein structure and quantification through one single measurement. One of the key applications of our methodology concerns the at–line monitoring of production processes and installed PAT tool at the client site.

The mission:

Spectralys Biotech is looking for a junior scientist to perform the laboratory activities related to method development and for carrying out the analyses outsourced by our clients. The majority of our projects concerns innovative biopharmaceutical products. You will be responsible for:

- Performing the analyses
- Processing the data, including statistical analyses
- Writing the reports and associated documents
- Presenting/ Discussing the results
- General maintenance of the equipment

Your profile:

- A Master degree in Chemistry/Biochemistry is required
- An experience with analytical tools applied to biomolecules is an asset
- Good communication skills
- Fluency in written and spoken English and French
- Well–organized, precise and reliable
- Highly–motivated, pro–active and autonomous

Our offer:

A one–year full time contract (might be renewable) in a promising start–up company and a stimulating work environment. If this project sounds appealing to you, please do not hesitate to contact and send your CV and application letter to allison.derenne@spectralysbiotech.com
