To combat the problem, this spin-off company develops ecological and healthy solutions aimed at eradicating domestic pests such as dust mites living in mattresses, chairs and other furniture. The product works by using bio-mimicry: pheromones are used to attract the dust mites to a cover, where they are trapped and then eliminated in the washing machine.

Next Step: New research projects on bed bugs and louses

Acar’up sprl creation (Domobios: parent company) 2014
“Acar’up” launch in pharmacy 2013
Spin-off creation February 2013
“Spin-off in Brussels” Grant at UCL 2009
“Prospective research in Brussels” at ULB 2005

Put an end to dust mite allergies
Domobios: a key player for the world of tomorrow
