Are you looking for exciting tasks at an international and fast-growing company and interesting scientific and personal development perspectives?

We are looking for a

**Project Biostatistician for Early Clinical Development (m/f)**

working in “Biostatistics” within the Global Clinical Development division at our Headquarters in Aachen (Germany).

**In this position you are responsible for**

- Providing statistical input at the clinical project and trial level in alignment with the overall clinical strategy
- Applying "state-of-the-art" statistical modeling, simulation, predictions and analysis methods for optimizing trial designs and clinical development programs
- Writing statistical plan, conducting data analyzes, interpreting, presenting and reporting statistical results
- Looking for opportunities for applying innovative statistics to research and development of new drugs
- Providing input to the clinical part of regulatory documents and representing statistics at regulatory authorities and in the scientific community
- Cooperating with Clinical Research Organizations
- Working according to ICH-GCP and ICH-biostatistics guidelines
- Instructing and supervising Trial Biostatisticians and Biostatistical Programmers

**You are qualified for this position if**

- You have proficiency and profound, at least 5 years experience in biostatistics in the pharmaceutical industry within a fast paced, change driven and international environment, preferably in early clinical development
- You have a University degree in mathematics/statistics, biometry or equivalent degree
- You have experience at interacting with very senior levels and effective at interacting with all levels of employees across highly matrixes organization
- You show profound problem solving skills, communication and consulting skills
- You are familiar with all relevant guidelines and aspects of clinical research
- You are a pro-active and self motivated personality and show strong team spirit, are flexible but persistent and result-oriented
- Proficient verbal and written skills in English are required.

We offer an exciting and challenging role in a future-oriented environment as well as excellent possibilities for personal and professional advancement.

**Have we aroused your interest? Then we look forward to making your acquaintance.**

As preparation for a personal discussion we ask you to send your completed application documentation, stating your desired salary, to: Grünenthal GmbH, Frank Poschen, Global Human Resources, 52099 Aachen, Germany – Frank.Poschen@grunenthal.com
