

## Clinical Data Analyst

We are a cutting-edge, technology focused solution and service provider. Our unique high value solution helps the pharmaceutical organizations to improve the quality and the integrity of their clinical trials. We are a young and fast-growing startup and we are looking for a talented and motivated **Clinical Data Analyst** to join our operational team, located in Louvain-la-Neuve, Belgium.

To apply for this position, please send us your resume by email: [contact@cluepoints.com](mailto:contact@cluepoints.com)

### Top Reasons to Work with Us

1. Work for a fast-growing and dynamic organization
2. Full time permanent position
3. Challenging work

### What You Will Be Doing

- Performing analyses with our in-house statistical engine, for diagnosing and explaining anomalies in the clinical data collected
- Exploring the data, summarizing findings and interpreting results given the setup of the clinical trial
- Communicating results to customers (both written report and oral presentation)
- Participate to the continuous improvement and development of our solution.

### What You Need for this Position

- A scientific or biomedical degree
- Able to compile, analyze and evaluate clinical data
- Able to understand and explain statistical results
- Able to accurately apply data to clinical issues
- Excellent analytical and decision making skills
- Able to understand complex database structure (i.e.: CDISC)
- Able to effectively communicate findings to other members of the research team
- Able to work in team and interact with persons issued from different fields (medical, data managers, IT, statistics...).
- Fluency in English, with excellent written and oral communication skills
- Able to evolve in a fast moving environment and bring innovative thinking to the development of our solution

### Additional assets

- Experience in using statistical software (R, SAS...) is a strong asset
- Programming skills in R language is a strong asset
- A degree in statistics is a plus
- Experience with CDISC databases is a plus
- Prior experience in the clinical field is a plus

### About CluePoints

CluePoints is a Central Statistical Monitoring solution that has been designed and perfected over the last 10 years. It employs unique statistical algorithms to determine the quality, accuracy and integrity of clinical trial data both during and after study conduct.

Aligned with guidance from the FDA and EMA, CluePoints is deployed to support traditional on-site monitoring and can be implemented as the engine to drive a risk-based monitoring strategy.

The value of using CluePoints lies in its powerful and timely ability to identify anomalous data and site errors allowing optimization of on-site monitoring and a significant reduction in overall regulatory submission risk.
