

Fellow Biostatistician

EORTC promotes multidisciplinary cancer research in Europe. EORTC research is conducted in over 300 university hospitals in 32 countries. Its network of investigators comprises more than 2500 scientist and clinicians collaborating in 20 multidisciplinary groups.

The EORTC offers a one-year research fellowship whose aim is for the trainee to acquire a detailed knowledge of the practical conduct of cancer clinical trials. This ideally would suit a:

Biostatistician (m/f)

The fellowship offers an excellent opportunity to learn the methodology for the design and analysis of cancer clinical trials by participating in the activities of the EORTC statistics department. A scientific research project will also be developed around application of recent statistical methods.

Support to the fellow is provided by a multidisciplinary staff including medical doctors and biostatisticians.

- The ideal candidate – under 35 years of age – would have a Master's degree in biostatistics or a strong science degree with excellent statistical skills.
- Previous experience with the use of SAS is required.
- A very good knowledge of English is also essential.

The fellowship will take place at the EORTC Headquarters in Brussels, Belgium.

Please send a curriculum vitae, a letter of intent and letters of recommendation from 2 referees to:
