

## **Fellow in biostatistics or statistics (m/f)**

**EORTC promotes multidisciplinary cancer research in Europe. EORTC research is conducted in over 300 university hospitals in 32 countries. Its network of investigators comprises more than 2500 scientists and clinicians collaborating in 20 multidisciplinary groups.**

**The EORTC offers a one-year research fellowship (renewable to a maximum of 3 years) whose aim is for the trainee to acquire a detailed knowledge of the practical conduct of cancer clinical studies.**

**The fellowship offers an excellent opportunity to learn the methodology for the design and analysis of cancer clinical studies by participating in the activities of the EORTC statistics department and testing/developing new methods for the design or analysis of clinical studies, thus contributing to the advancement of the statistical methodology used in the department. By the end of the fellowship, the candidate will have been immersed in cancer clinical trials at an international academic cooperative level.**

**Support to the fellow is provided by a multidisciplinary staff including medical doctors and biostatisticians.**

- **The ideal candidate – under 35 years of age – would have a PhD degree in biostatistics or equivalent science degree with excellent statistical skills.**
- **Knowledge and/or experience of survival data analysis is an asset**
- **Ability to work independently, under supervision of a senior statistician**
- **Previous experience with the use of SAS is required.**
- **A very good knowledge of English is also essential.**

**The fellowship will take place at the EORTC Headquarters in Brussels, Belgium. Please send a curriculum vitae, a letter of intent and letters of recommendation from 2 referees to:**
