

IDDI (International Drug Development Institute) is an international data center in the field of clinical research headquartered in Belgium with offices in the U.S. The following position is open in our Ottignies Louvain-La-Neuve office:

Associate Biostatistician

Your Responsibilities:

You will be involved in statistical aspects of clinical trials or research projects:

- Programming analysis datasets, pooled datasets, listings, tables, summaries and graphs for clinical trials in SAS
- Conducting statistical analyses and performing quality control
- Reporting and interpreting the results
- Performing other duties related to the work described above

Your Profile:

- Master or PhD in biostatistics, statistics or mathematics
- Knowledge of SAS (knowledge of R would be an asset)
- Strong computer and analytical skills
- Good written and verbal communication skills
- Fluent in English
- Ability to set priorities and respect tight deadlines
- Problem solving skills, team player

We offer a challenging opportunity in an innovative and growing company.

Please send your CV to IDDI by e-mail: hr@iddi.com as soon as possible.
