IT Developer - Statistics

What you can expect:

With the hiring of an IT developer - Statistics, CropDesign wants to strengthen its team of statisticians that is responsible for experimental design and data analysis in the field of agricultural crops.

The IT developer - Statistics will develop and improve local and global IT infrastructure, and maintain database systems to enhance the team's efficiency to perform data analysis. He/she will develop web-based systems for reporting analysis results to customers, and improve procedures through automation and standardization. In addition, he/she will be active as a statistician, and contribute to data analysis, interpretation of results and reporting to biologists.

What we expect:

You have a master degree or higher in a relevant field (IT, statistics, or related) or at least 3 years of relevant work experience. You have ample experience in computer programming and databasing (SQL). In addition, you have demonstrated experience in development and implementation of IT processes to support a team, and the development of customized web applications. Furthermore, you show a keen interest in the general field of data analysis and statistics and have some basic knowledge of statistical analysis techniques. Experience in the field of agronomy, breeding or biotechnology will be highly appreciated. You are a team player and show flexibility in sharing workload with the other team members. Furthermore, you have good organizational skills and multi-tasking abilities and you speak fluent English.

We offer:

We offer you a challenging job in a dynamic and international environment in one of the worldwide leading plant biotech companies.

You will receive an indefinite contract and an attractive compensation package in line with responsibilities and experience.

Expect to be surprised by the exciting range of career opportunities at BASF.
