

OpenAnalytics

Job Opening Data Analyst

Profile

OpenAnalytics is an international company based in Antwerp (Belgium) providing data analysis services and products across geographies and industrial sectors. We are looking to expand our team of data analysts with a candidate who fits the following profile:

- MSc/PhD in Computational Biology, Bioinformatics or Statistics with a keen interest in data analysis
- team player and good communicator with fluency in English, verbal and written
- practical experience with R / BioConductor is an asset

Description

The successful candidate will

- interact with biologists from biotechnology and pharmaceutical companies in order to transform their research questions into a suitable analysis approach
- perform data analyses on experimental datasets to unravel biological processes
- digest messages in the dataset into effective visualizations and offer an insightful presentation of statistical modeling results

Offer

We offer

- a pleasant and challenging environment in which each person can develop their talents
- opportunities to work on exciting problems at the edge of current knowledge and at the forefront of data analysis technologies
- competitive remuneration package and benefits in line with skills and experience

Applications and enquiries on the position can be sent to careers@openanalytics.eu until **September 15, 2014**.
