

We are looking for

Principal Statistician CMC Development

Job description :

- Responsible for the statistical support within all groups within Technical Operations (TO) .
- Provide troubleshooting support in line with TO business needs.
- This position provides statistical expertise for the design and analysis of processes of NCE and NBE's (drug substance and drug products) as well as laboratory procedures and experiments.
- The position will also promote the understanding of ICHQ8 and Quality by Design principles within TO.
- The role is integrated with projects to drive greater understanding and insights from R&D data, enabling clear, defensible and timely data-driven decisions and actions, accelerating project completion and supporting submission files.

Qualifications :

- Bachelor degree with a scientific-mathematical background (mathematics, applied mathematics, engineer).
- +2 years of experience for a Ph.D in statistics or for a M.S. as statistician in product development within the pharmaceutical industry.
- Other industry experience (pharmaceutical in clinical or preclinical, Chemistry industry, Food industry) may be considered.
