

The UZ Brussel of the Vrije Universiteit Brussel was founded in 1977 and has since developed into one of Belgium's most advanced hospitals. With 729 beds and more than 3000 employees, the UZ Brussel occupies a key position in the hospital sector in Flanders and Brussels.

## Statistician

To provide statistical and methodological expertise as member of the University Medical Center (UMC) 'Statistics & Methodology' core facility. We are primarily looking for a biostatistician with additional knowledge of clinical trial design and analysis. The candidate will join a team consisting of 2 colleague statisticians, helping biomedical researchers and clinicians in study design and statistical analyses. For this particular position, the candidate will closely work together with the Clinical Trial Center of the University Hospital (UZ Brussel) and participate at the CTC team meetings.

### Profile:

- Master and/or PhD in biostatistics or applied statistics or equivalent.
- Experience in biostatistics, in statistical programming, in the design and analysis of clinical trials.
- Thorough technical knowledge of one or more of the following statistical software packages: SAS, Stata, R, SPSS.
- Strong communication skills and ability to communicate statistical issues with non-statistical researchers.
- Organizational skills to work toward and meet deadlines.
- Fluent in English. Knowledge of Dutch is a plus.

### Offer:

- An intellectually stimulating, international and socially committed environment, with room for personal initiative.
- We offer an open-ended contract with a salary in accordance with this position and provide a comprehensive benefits package including supplementary pensions, life insurance, health insurance, private nursery, child care during holidays, subsidized meals, ...
- An academic position can be considered.

### Application

Application deadline: 17/08/2015. You can apply via our website: [www.werkeninhetuzbrussel.be](http://www.werkeninhetuzbrussel.be).
